

# TABLE OF CONTENTS

## VOLUME 77 (EP), 1990

### MAIN ARTICLES

|   |     |
|---|-----|
| The human fetal auditory evoked potential<br>K. Staley, V. Iragui and M. Spitz (U.S.A.)   | 1   |
| Human middle-latency auditory evoked potentials: vertex and temporal components<br>A.T. Cacace, S. Satya-Murti and J.R. Wolpaw (U.S.A.)   | 6   |
| Intra-ponto-mesencephalic recording of binaural interaction in human brain-stem auditory evoked potentials<br>G. Curio and K. Weigel (F.R.G.)   | 19  |
| Posterior cervical N13 in median nerve SEP has two components<br>M. Sonoo, T. Shimpo, K. Genba, M. Kunimoto and T. Mannen (Japan)   | 28  |
| Origin of scalp far-field N18 of SSEPs in response to median nerve stimulation<br>E. Urasaki, S. Wada, C. Kadoya, A. Yokota, S. Matsuoka and F. Shima (Japan)   | 39  |
| Cerebral evoked potentials after stimulation of the posterior urethra in man<br>M.V. Hansen, Ç. Ertekin and L.-E. Larsson (Sweden)  | 52  |
| Changes of somatosensory evoked potentials with increase of intracranial pressure in the rat's brain<br>A. Witzmann (F.R.G.)  | 59  |
| Amplitude and latency characteristics of spinal cord motor evoked potentials in the rat<br>S.T. Dull, P.E. Konrad and W.A. Tacker, Jr. (U.S.A.)   | 68  |
| Amplitude asymmetry of hemifield pattern reversal VEPs in healthy subjects<br>Y. Abe and Y. Kuroiwa (Japan)   | 81  |
| The effect of stimulus frequency on post- and pre-central short-latency somatosensory evoked potentials (SEPs)<br>X. Delberghe, N. Mavroudakis, D. Zegers de Beyl and E. Brunko (Belgium)                           | 86  |
| Presence of two subcomponents in P9 far-field potential following stimulation of the median nerve<br>A. Yasuhara, T. Yamada, Y. Seki, T. Emori, P. Vachatimanont, K. Andoh, M. Ando, M. Ross and J. Kimura (U.S.A.) | 93  |
| Somatosensory evoked potentials and magnetic resonance imaging in intraspinal neoplasms<br>B. Jabbari, C. Geyer, M. Schlatter, B. Scherokman, M. Mitchell, J.W. McBurney, C. Elbrecht and C.H. Gunderson (U.S.A.)   | 101 |
| Ontogenesis of lumbar spinal somatosensory evoked potentials after posterior tibial nerve stimulation in the rat<br>P.J. Brunquell, G.W. Taylor, G.L. Holmes and D.S. Feldman (U.S.A.)                              | 112 |
| Chronic effects of phenytoin on brain-stem auditory evoked potentials in man<br>Y.W. Chan, E. Woo and Y.L. Yu (Hong Kong)   | 119 |
| Three-channel Lissajous' trajectories of auditory event-related potentials to target stimuli<br>J. Attias and H. Pratt (Israel)   | 127 |
| Median nerve somatosensory evoked potentials in profound hypothermia for ascending aorta repair<br>J.M. Guérin, L. Soveges, P. Baele and R. Dion (Belgium)  | 163 |
| The P300 event-related potentials in dementia of the Alzheimer type. Correlations between P300 and monoamine metabolites<br>J. Ito, S. Yamao, H. Fukuda, Y. Mimori and S. Nakamura (Japan)                          | 174 |
| P300 assessment of early Alzheimer's disease<br>J. Polich, C. Ladish and F.E. Bloom (U.S.A.)  | 179 |
| Stationary pattern adaptation and the early components in human visual evoked potentials<br>H.K. Hudnell, W.K. Boyes and D.A. Otto (U.S.A.)   | 190 |
| Power spectrum and optimal filtering for visual evoked potentials to pattern reversal<br>N.F. Skuse and D. Burke (Australia)  | 199 |
| Optimal ('Wiener') digital filtering of auditory evoked potentials: use of coherence estimates<br>R.A. Dobie and M.J. Wilson (U.S.A.)   | 205 |
| Binaural interaction in the brain-stem auditory evoked potential: evidence for a delay line coincidence detection mechanism<br>S.J. Jones and J.C. Van der Poel (U.K.)  | 214 |

|   |     |
|---|-----|
| Auditory evoked potentials from the primary auditory cortex of the cat: topographic and pharmacological studies<br>R.T. Knight and S. Brailowsky (U.S.A.)   | 225 |
| Emulation of somatosensory evoked potential (SEP) components with the 3-shell head model and the problem of 'ghost potential fields' when using an average reference in brain mapping<br>J.E. Desmedt, V. Chalklin and C. Tomberg (Belgium)                       | 243 |
| Inadequacy of the average reference for the topographic mapping of focal enhancements of brain potentials<br>C. Tomberg, P. Noël, I. Ozaki and J.E. Desmedt (Belgium)   | 259 |
| Bit-mapped somatosensory evoked potentials and muscular reflex responses in man: comparative analysis in different experimental protocols<br>P.M. Rossini, C. Paradiso, F. Zarola, R. Mariorenzi, R. Traversa, G. Martino and M.D. Caramia (Italy)                | 266 |
| Somatosensory evoked potentials and magnetic resonance imaging in syringomyelia<br>B. Jabbari, C. Geyer, C. Gunderson, A. Chu, J. Brophy, J.W. McBurney and B. Jonas (U.S.A.)   | 277 |
| Wave form decomposition of 'giant SEP' and its computer model for scalp topography<br>H. Shibasaki, M. Nakamura, S. Nishida, R. Kakigi and A. Ikeda (Japan)   | 286 |
| Cross-correlation and latency compensation analysis of click-evoked and frequency-following brain-stem responses in man<br>G.C. Galbraith and W.S. Brown (U.S.A.)   | 295 |
| Brain-stem auditory evoked response: normative values in children<br>J. Thivierge and R. Côté (Canada)  | 309 |
| Visual evoked potentials in Alzheimer's disease: correlations with age and severity<br>M.P. Philpot, D. Amin and R. Levy (U.K.)   | 323 |
| Effects of chlorpromazine on pattern and flash ERGs and VEPs compared to oxazepam and to placebo in normal subjects<br>P. Bartel, M. Blom, E. Robinson, C. Van der Meyden, D.K. Sommers and P. Becker (South Africa)  | 330 |
| Abnormalities of parietal and prerolandic somatosensory evoked potentials in Huntington's disease<br>G. Abbruzzese, D. Dall'Agata, M. Morena, L. Reni and E. Favale (Italy)   | 340 |
| Correlation of tibial nerve SEPs with the development of seizures in patients with supratentorial cerebral infarcts<br>T. Kovala, U. Tolonen and J. Pyhtinen (Finland)  | 347 |
| Projection of thenar muscle afferents to frontal and parietal cortex of human subjects<br>S.C. Gandevia and D. Burke (Australia)  | 353 |
| Alcohol and the auditory brain-stem response, brain temperature, and blood alcohol curves: explanation of a paradox<br>J.A. Lee, E.P. Schoener, D.W. Nielsen, A.R. Kelly, W.-N. Lin and R.F. Berman (U.S.A.)  | 362 |
| Modulation of vibrissa-evoked cortical potentials after infraorbital nerve crush in rats<br>Y. Shiraki and T. Satoh (Japan)   | 376 |
| Motor potentials evoked by paired cortical stimuli<br>M. Inghilleri, A. Berardelli, G. Cruccu, A. Priori and M. Manfredi (Italy)  | 382 |
| A comparison of corticospinal activation by magnetic coil and electrical stimulation of monkey motor cortex<br>V.E. Amassian, G.J. Quirk and M. Stewart (U.S.A.)  | 390 |
| Somatosensory evoked potentials following tongue stimulation in normal subjects and patients with lesions of the afferent trigeminal system<br>E. Altenmüller, C.P. Cornelius and U.W. Buettner (F.R.G.)  | 403 |
| Effects of hypothermia on short latency somatosensory evoked potentials in humans<br>O.N. Markand, C. Warren, G.S. Mallik, R.D. King, J.W. Brown and Y. Mahomed (U.S.A.)  | 416 |
| Temperature-dependent hysteresis in somatosensory and auditory evoked potentials<br>O.N. Markand, C. Warren, G.S. Mallik and C.J. Williams (U.S.A.)   | 425 |
| Mismatch negativity (MMN) for sequences of auditory and visual stimuli: evidence for a mechanism specific to the auditory modality<br>G. Nyman, K. Alho, P. Laurinen, P. Paavilainen, T. Radil, K. Reinikainen, M. Sams and R. Näätänen (Finland, Czechoslovakia) | 436 |
| Influence of click polarity on the brain-stem auditory evoked response (BAER) revisited<br>D.M. Schwartz, M.D. Morris, J.D. Spydell, C. Ten Brink, M.A. Grim and J.A. Schwartz (U.S.A.)   | 445 |
| Effects of stimulus repetition rate on ABR threshold, amplitude and latency in neonatal and adult Mongolian gerbils<br>G.S. Donaldson and E.W. Rubel (U.S.A.)   | 458 |

## SHORT COMMUNICATIONS

|  |     |
|--|-----|
| Neonatal auditory brain-stem response threshold and latency: 1 hour to 5 months<br>C. Adelman, H. Levi, N. Linder and H. Sohmer (Israel) | 77  |
| Pudendal SEP and bulbocavernosus reflex in women<br>D.B. Vodusek (Yugoslavia)  | 134 |

|   |     |
|---|-----|
| Preservation of evoked potentials in a case of anterior spinal artery syndrome<br>M.H. Zornow, M.R. Grafe, C. Tybor and M.R. Swenson (U.S.A.)   | 137 |
| Reappearance of brain-stem auditory evoked potentials after surgical treatment of a brain-stem hemorrhage: contributions to the question of wave generation<br>G. Zanette, A. Carteri and S. Cusumano (Italy)                             | 140 |
| Short- and middle-latency auditory evoked potentials in abstinent chronic alcoholics: preliminary findings<br>F. Díaz, F. Cadaveira and C. Grau (Spain)   | 145 |
| Event-related brain potential of human newborns to pitch change of an acoustic stimulus<br>K. Alho, K. Sainio, N. Sajaniemi, K. Reinikainen and R. Näätänen (Finland)   | 151 |
| The estimation of time varying dipoles on the basis of evoked potentials<br>J.C. De Munck (The Netherlands)   | 156 |
| Spinal intramedullary recording of human somatosensory evoked potentials<br>E. Urasaki, S. Wada, C. Kadoya, A. Yokata and S. Matsuoka (Japan)   | 233 |
| Neuromagnetic evidence of a dynamic excitation pattern generating the N100 auditory response<br>R.L. Rogers, A.C. Papanicolaou, S.B. Baumann, C. Saydari and H.M. Eisenberg (U.S.A.)  | 237 |
| Maps of somatosensory evoked potentials (SEPs) to mechanical (tapping) stimuli: comparison with P14, N20, P22, N30 of electrically elicited SEPs<br>M. Onofri, M. Basciani, T. Fulgente, S. Bazzano, G. Malatesta and L. Curatola (Italy) | 314 |
| Auditory brain-stem responses in the rat brain isolated from the body trunk and maintained via cross-circulation<br>Y. Nishimura and T. Tonoue (Japan)  | 320 |

## BOOK REVIEW

|   |          |
|---|----------|
| Evoked potentials in clinical medicine, 2nd edn.<br>by K. Chiappa | 402      |
| <i>Report from the Editors</i>                                    | 161      |
| <i>Announcement from the Publisher</i>                            | iii, 241 |
| <i>Index of Authors to Volume 77 (1990)</i>                       | 471      |
| <i>Index of Subjects to Volume 77 (1990)</i>                      | 475      |
| <i>Table of Contents to Volume 77 (1990)</i>                      | 480      |
